Hands-On-Orgs: <https://trailhead.salesforce.com/users/profiles/orgs>

Create new Fields

Open your Trailhead Playground where you are going to create new fields on the Contact object. Open the Setup by clicking the gear icon in the top right corner.

In the Object Manager select the Contact object and under Fields & Relationships create a new field, called Primary Contact (Primary_Contact). The field's data type should be Checkbox and it should be unchecked by default. You can keep the rest of the settings as it is by default.

Then create another field called Contact LinkedIn Page (Contact_Linkedin_Page). This field should be a maximum 80 characters long text field. You can keep the rest of the settings as it is by default.
